- + Defense program increases the nation's preparedness against chemical threats.

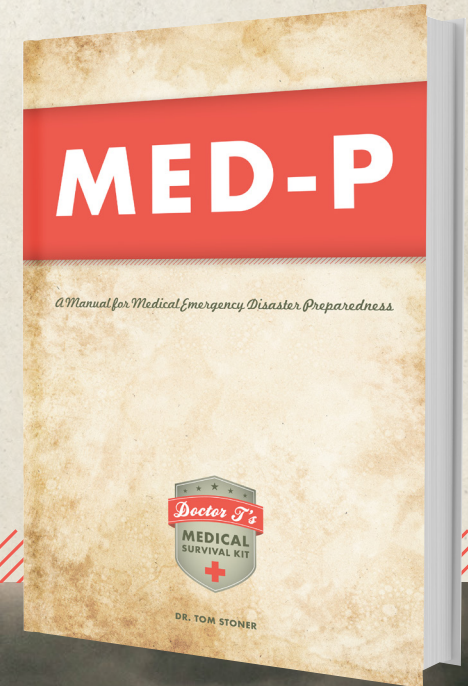

### » All Medical Topics

### » Individual & Corporate Training

### » Inservices

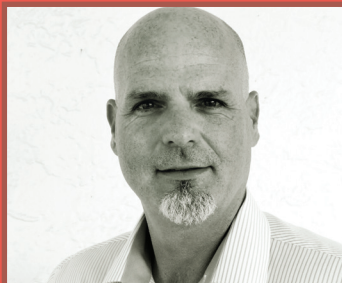

# Med-P

**"A Manual for Medical Emergency Disaster Preparedness".**  
**Volume II will on sale now.**

**HOW WILL YOU** *prepare*  
*for a* **MEDICAL EMERGENCY DISASTER?**

Dr Thomas Stoner is a board certified practicing adult medicine specialist who has been in medicine since 1991. His practice specialty includes: gastrointestinal, infectious and adult medicine. Dr Stoner is currently the director of a Hospitalist program in Pennsylvania and served in the USAF Medical Corp from 1995 to 2005 where he worked with Anthrax and Smallpox.

Dr Stoner has lectured for pharmaceutical companies including Astra Zeneca, Merck, Bristol Myers Squib and Pfizer. His major concerns for our country include Anthrax, Smallpox and Dirty Bomb. He will be lecturing on topics that include Respiratory concerns of Anthrax, Smallpox, Influenza and the hysteria concerns of Dirty bomb. Dr Stoner will describe what is needed in a medical emergency kit and the best way to obtain medicines and supplies.

Dr Stoner is co owner of TSSP Inc, a company that provides emergency consulting as it relates to "Survival Scenarios" and common sense emergency kits. He will also be offering his most recent book, MED-P, which describes major medical diseases and their threat to our society and what you need to do to protect yourself and your loved ones. Dr Stoner became involved in preparedness after 911 and has major concerns about the ability of our current system to manage any medical calamity given the fact that the USA is financially broke and our medical system is currently 15,000 physicians short and will continue in this trend with no end in sight.
